

# Mobile Based Payment Solution for Buyers

## Problem Statement

Implement a mobile based payment solution for buyers relieving them from carrying card/cash.

## Solution

- Ensures security of payment transactions
- Buyer's consent taken before a transaction
- Payment receipts
- Transaction history
- API to interface/integrate payment option in Merchant's end user apps
- PCI compliant
- Profile Management
- Multi-lingual
- Available on both Android & iOS

## Technical Details

- Using Ethereum blockchain platform
- Technology used - C#, Xamrin
