

# Digital Diary for Lawyers

## Problem Statement

Implements a solution for lawyers to manage court cases while they are on move. It was difficult for lawyers to manage/ find records on papers, to reduce paperwork load we make a software through which a lawyer can manage their court case from any place or time using mobile and desktop.

## Solution

- Default view of cases for today, tomorrow & next week
- Update cases
- Generate CauseList for a specific date range
- Advance Search (keyword & date range)
- Live Dashboards for High Courts & Supreme Courts
- Access from anywhere using Android/iOS phone
- Secured using SSL

## Technical Details

- Technology used- C#, .net, Java, Objective C
